

A photograph of two men in business suits standing in front of a modern glass building. The man on the right is older, with white hair and glasses, and is gesturing with his hands as if speaking. The man on the left is younger, with dark hair, and is listening attentively.

# Cisco Tidal Enterprise Scheduler Services

**In order to realize business success, organizations must create a unified production environment using a scheduling solution that can centrally and efficiently manage numerous diverse applications.**

In addition, a scheduler must be able to integrate additional applications into the environment quickly and smoothly, as well as enable communication with applications from external organizations. Only a scheduling solution can tackle such versatile and critical business requirements.

Cisco Tidal Enterprise Scheduler simplifies job scheduling, and automates and tracks how jobs are carried out. Tidal Enterprise Scheduler provides a single point of control and visibility for job scheduling, managing, and performing all scheduling processes.

Cisco Tidal Enterprise Scheduler promotes efficiency by centralizing workflow automation and provides a single view of cross-enterprise job scheduling events that help organizations assemble complex batch job and business process schedules that span the enterprise.

IT operations teams can efficiently schedule processes that encompass a wide range of databases, systems, and applications. They can also easily incorporate and manage new applications as they come online, which helps improve the operation of mission-critical business processes as the enterprise expands and evolves.
