

A man with a goatee, wearing a light blue button-down shirt, stands with his arms crossed in a server room. The background is filled with rows of server racks, some with blue lights. The text 'INFRASTRUCTURE SOLUTIONS' is overlaid in large, white, bold, sans-serif capital letters across the middle of the image.

INFRASTRUCTURE SOLUTIONS

**Agile Infrastructure,
The Platform for Business Growth**

Planning, designing and implementing organizational IT strategies and managing mission-critical IT infrastructure is essential for smooth business operations.

The demand of the modern business environment makes it a fundamental requirement that infrastructure aligns with business objectives. GSS Infrastructure Services deliver end-to-end, effective and reliable solutions that can help transform your business. We help you enhance business performance by aligning technology with business priorities.

GSS Infrastructure Solutions are designed to reduce complexity, enhance security, and simplify your IT environment. We work with you to identify inefficiencies, eliminate gaps, and deploy the technical innovations that secure your business assets and help to increase competitive advantage.

Our complete range of infrastructure services can help you build and manage highly available, reliable IT infrastructures capable of meeting the dynamic needs of your business.

Virtualization Services

Virtualization helps you improve the efficiency, agility and availability of IT resources and applications. We help you optimize your IT resources through a virtualized IT infrastructure that drives down hardware, power, cooling and management costs.

Whether you are just starting down the path of virtualization, or aspire to increase your virtualization ratio, GSS Infotech can help. Building on a wide range of expert-level services including strategy and planning, migration, consolidation, implementation and ongoing support, GSS Infotech creates solutions that fit your business from the desktop to the datacenter.

- Server Virtualization
- Desktop Virtualization
- Application Virtualization
- Network Virtualization
- Storage Virtualization
- File Virtualization
- Data Virtualization

About GSS Infotech

GSS Infotech provides enterprise level technology solutions that focus on driving business efficiency and reducing total cost of ownership. Founded in 1999, GSS Infotech operates worldwide through offices in the U.S., India and the Middle East. We provide customized and cost-effective solutions to customers, focusing on Infrastructure Management, Cloud Enablement and Application Development.

Datacenter Services

Future-ready data centers are essential for business operations. IT organizations face pressures to upgrade capability, and enable new highly redundant data centers that drive down energy costs, and increase management capabilities.

Our datacenter services help you create sustainable, highly efficient data centers that will serve your needs now and scale as your business grows. Our wide array of Datacenter Services include a careful review of your existing data center for reliability, energy efficiency, points of failure, disaster recovery preparedness.

- Datacenter Assessment Services
- Datacenter Consolidation & Optimization
- Datacenter Migration Services
- Datacenter Operations Management
- Datacenter Compliance
- Datacenter Greening

Storage, Backup, DR & BC

As data volumes within organizations continue to increase, data storage, backup,

and recovery functions are critical elements of continuous business operations. You need to have adequate storage resources to operate your IT applications and services.

But this is only part of the equation, ensuring that your back up windows are manageable and your storage is optimized and achieves compliance mandates are critical elements to any storage solution.

Our storage and backup services are designed to provide cost-effective solutions to help increase your data availability, ensure you are able to meet compliance standards, and protect your critical information from catastrophic system failures, accidental loss and damage.

- Storage Consolidation and Virtualization
- Backup and Recovery
- Business Continuity and Disaster Recovery
- Data Management
- Archiving
